Software Engineering Interns for Summer 2018

---

# Software Engineering Internship – Summer 2018

Applications Now Being Accepted – UChicago Job Board or [www.narrativescience.com/careers](http://www.narrativescience.com/careers)

- Overview
  - 8-10 weeks with flexible start/end dates
  - Work side-by-side our engineers on production-level code
  - Build out infrastructure and contribute to new product features
  - Established mentorship framework
- Past Projects
  - Updating advanced NLG engine to use machine learning to determine an optimal sentence from a selection of possible sentences
  - Extending Quill to include a verb dictionary (providing the ability to understand verb conjugation, tense and context)
  - Built out real-time dashboards in Tableau to display on monitors in the office to display systems health along with an automated story describing how things are running

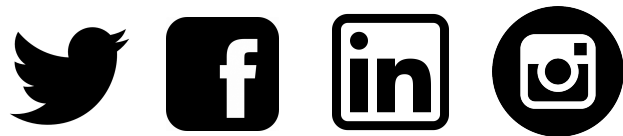

# Internship Requirements

Applications Now Being Accepted – UChicago Job Board or [www.narrativescience.com/careers](http://www.narrativescience.com/careers)

- Who can apply?
  - Rising seniors (Graduating 2019)
